JHA pilot project on bilateral data exchange with the US

17.5.2023

[Answer in writing](#)

Question for written answer E-001574/2023

to the Commission

Rule 138

Cornelia Ernst (The Left)

The Commission is planning a pilot project on bilateral data exchange with the US in the area of justice and home affairs (JHA), including border management, and is developing a concept for it. Implementation is then to be trialled by individual Member States.

1. Where did the initiative come from for a concept for bilateral data exchange with the US in the JHA field, including border protection, and when was that decision taken?
2. What types of data are to be exchanged in the process and, as things stand, which Member States intend to test this out?
3. What is the timetable for presenting the concept, for it to be trialled by individual Member States and for a report to be submitted to the Council's IXIM working party?
