

SB21
Business Angels

GET STARTED

Founders,

We are a group of friends and internet/tech entrepreneurs who first met in the 2000s and mostly worked together in Saarbruecker Strasse 21 in Berlin Prenzlauer Berg. All of us started successful businesses, we are founders and share a passion for building great companies.

As active business angels, we invest in young startup and digital companies, either individually or collectively in this group since 2011. We provide seed funding for killer-founders and great ideas. But way more important: we help you to avoid mistakes that we have already made (and yes, we've made a lot). We introduce you to the right people. We provide you with all the experience that we have. Not just talking about it but helping you hands-on.

Your friends from SB21

TEAM

We are a group of friends and entrepreneurs who have all built successful companies, sold or IPO'ed. We come with diverse backgrounds but our common ground is mutual friendship and the joy in investing in other startups.

INVESTMENTS

This section shows investments that members from our group participate in. We invest into a wide range of topics given the diverse background of the SB21 team. It is our firm believe that we can add value by transferring insights from one industry to another. We are quick decision makers and are available whenever you need support, an intro or just a sounding board for a new idea.
