Nemo Buschmann

Defense & Security | Bridging Technology and Policy

Berlin, Berlin, Deutschland

Zusammenfassung

I work at the intersection of defense & security, policy, and technology — bridging the gap between strategy and real-world operational challenges.

In my current roles at Bitkom and DIGITALEUROPE, I focus on public security and defense topics, facilitating dialogue between government institutions, defense stakeholders, and technology-driven companies at both national and European levels. My work is about translating complex strategic and regulatory requirements into actionable frameworks that help industry and decision-makers deliver impact.

Previously, I worked as a consultant at Capgemini Invent, delivering strategic IT, digital transformation, and innovation projects in the defense and security domain.

Alongside my civilian career, I serve as a Reserve Service Member in Germany's Armed Forces, gaining hands-on insight into defense operations, resilience, and organizational dynamics.

_____
